Danitol[®] 2.4 EC Spray delivers quick knockdown and controls a broad spectrum of pests, including spotted wing drosophila, plum curculio, oriental fruit moth, European red mite, two-spotted spider mite*, Japanese beetle, stink bugs (excluding Brown), green fruitworm and others.

- ▶ Broad spectrum—quick knockdown of a broad range of insects
- ▶ Proven not to flare mites
- ▶ Short 24-hour re-entry interval (REI)

Product	Active Ingredient	PHI (days)
Danitol	fenpropathrin	3
Assail [®]	acetamiprid	7
Entrust [®] / Success [®]	spinosad	7 (for cherries)

Knockdown of Spotted Wing Drosophila Adults

Spotted wing drosophila (SWD) has been found infesting ripening cherry, raspberry, blackberry, blueberry and strawberry crops. It has also been observed attacking other soft-flesh fruit, such as boysenberry, varieties of Japanese plums, plumcots and nectarines. *Danitol* provides SWD adult female control.

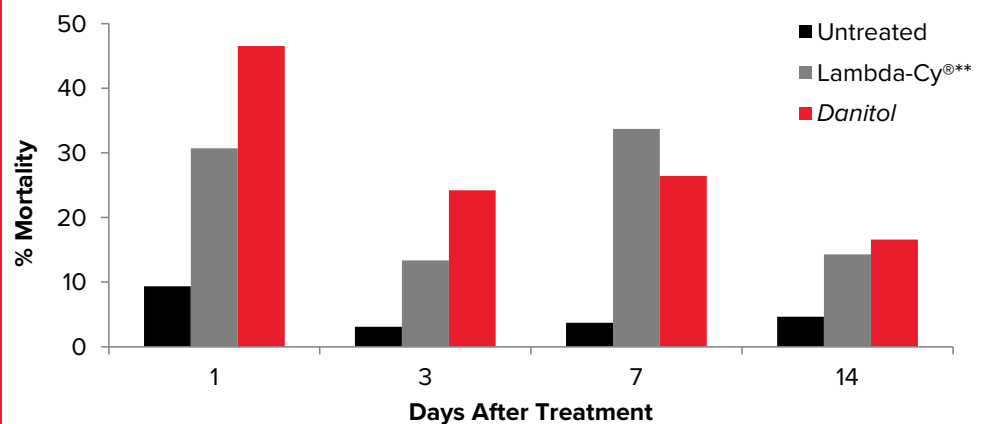

Spotted Wing Drosophila (SWD) Adult Female Control in Black Cherries

Adult females lay eggs in ripening fruit and the larvae cannot be controlled. You need to control the female before she lays her eggs in the marketable, high-value fruit.

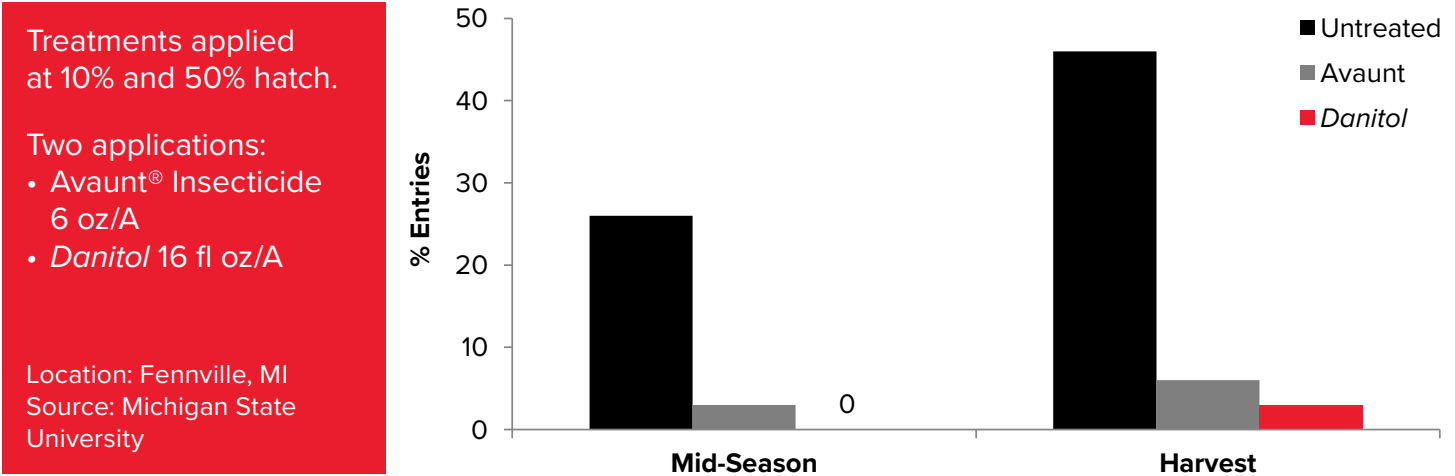

**2(ee) for SWD on sweet and tart cherries in CA, ID, MI, MT, OR, UT, WA and WI.

Location: Tracy, CA
